About

The Brisbane & The Gold Coast Stop Smoking Clinic

We have been established since 2010, with the sole purpose of helping smokers to become committed non-smokers who never think about cigarettes again rather than just ex smokers who always struggle to avoid the habit.

We are fully insured, qualified with Public Indemnity Insurance that allows us to conduct sessions at any location in this county

The owner, Ann-Marie Johansen works with over 500 people each year to assist them to become non-smokers. We use a blend of Hypnosis, Behavioural Adjustment to achieve this. Our model is simple yet effective for the determined person.

Like all aids to assist people to stop smoking we are not 100% successful, but our model has shown that less than 10% of people take us up on the offer of a second, no charge session.
